# Our Foundations

## About Us

K&J Civil Pty Ltd, headquartered in Pinkenba, Queensland, is a privately owned civil contracting company delivering high-quality infrastructure projects across South East Queensland and interstate.

With more than two decades of industry experience, K&J Civil has developed a strong reputation for technical capability, reliability, and safety in the delivery of water, sewer, and civil utility infrastructure.

We take pride in our hands-on approach, collaborative project delivery, and long-term relationships with clients, councils, and principal contractors. Our success is built on a culture of integrity, teamwork, and continuous improvement — ensuring every project is delivered safely, efficiently, and to the highest standard.

## Our Expertise

Our team brings together decades of civil utilities experience, combining hands-on technical skill with a strong commitment to safety, quality, and environmental excellence.

We specialise in the construction and maintenance of water and sewer infrastructure, live system connections, and complex utility installations — from planning and design through to reinstatement and commissioning.

K&J Civil is trusted for our responsiveness, open communication, and ability to adapt to the challenges of each project, delivering cost-effective, compliant, and long-lasting outcomes for our clients.

## Our Standards

K&J Civil maintains certifications in:

- ISO 9001 – Quality Management
- ISO 14001 – Environmental Management
- ISO 45001 – Occupational Health and Safety Management

These certifications ensure that all operations meet internationally recognized standards and demonstrate our ongoing commitment to safety, quality, and environmental excellence

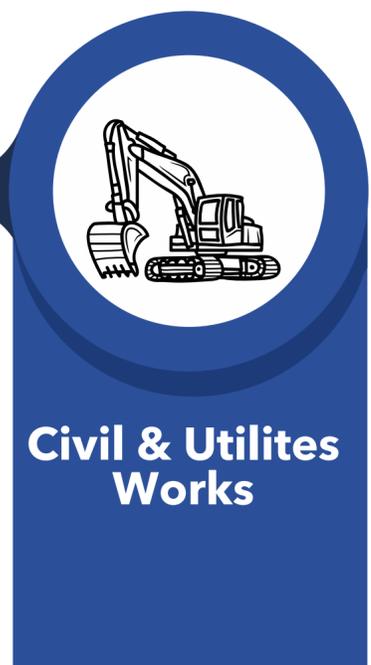

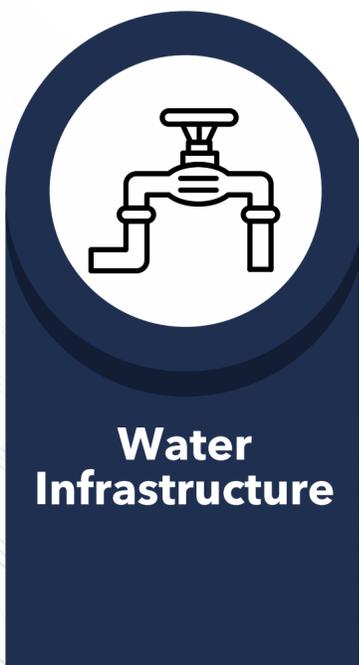

# Our Core Services

## and Capabilities

K&J Civil Pty Ltd provides integrated civil construction and utilities services across the South East Queensland region.

Our expertise lies in water, sewer, and stormwater infrastructure, supported by over two decades of proven performance in the utilities sector

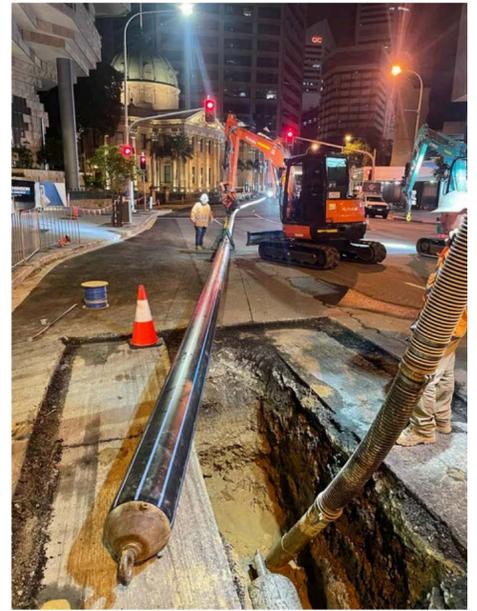

Through ISO-certified systems in Quality (9001), Environment (14001), and Safety (45001), K&J Civil ensures every project is executed safely, efficiently, and to the highest standard of compliance.

# Our Construction Capabilities

K&J Civil delivers complete civil construction and trenching solutions across water, wastewater, and utility infrastructure. Our team is experienced in all facets of excavation, pipelaying, and connection works, with particular expertise in:

- **Potable Water Reticulation and Trunk Mains**
- **Wastewater Reticulation and Carrier Mains**
- **Stormwater Construction Works including Pipelaying and Concrete Pit and Structural Works**
- **S-Gate valve Installations and Live Tappings**

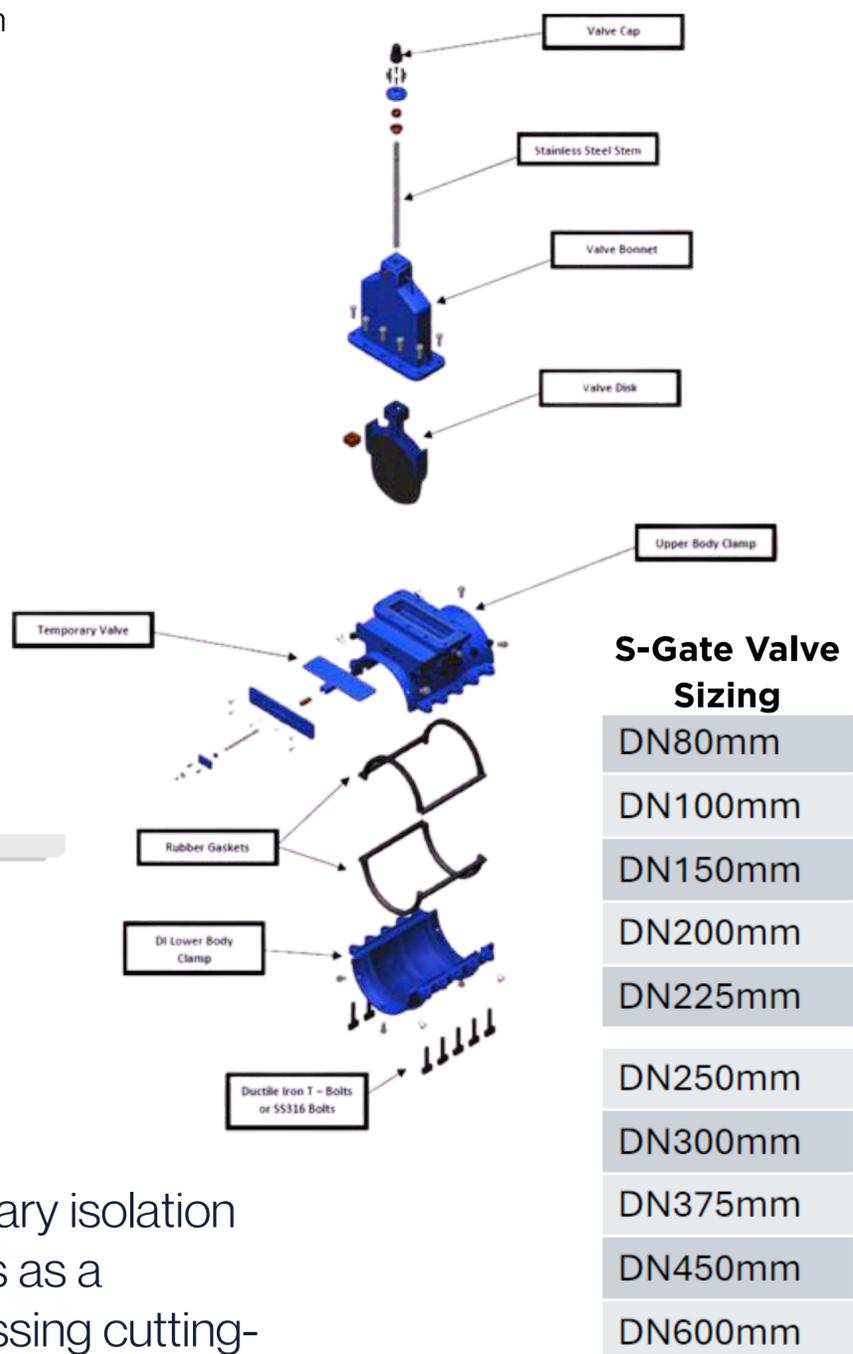

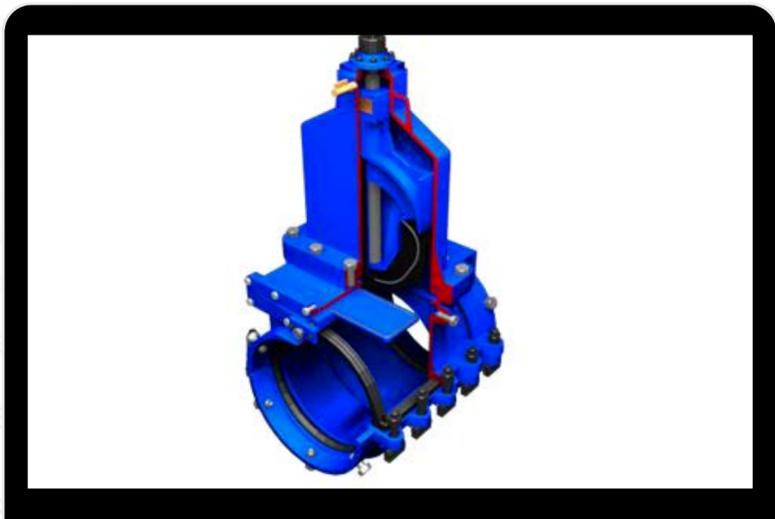

K&J Civil combines technical capability with a hands-on approach to safely deliver quality outcomes on time and to specification, across a wide range of civil infrastructure environments.

# Our Innovative Services

The S-Gate Valve, a pioneering and accredited innovation, offers seamless valve installation at any desired location without disrupting water supply. Specially engineered for potable water systems, this durable and resilient seated gate valve boasts a high-quality ductile iron construction

S-Gate Valve - PN16 Under Pressure Valve Installation

The S-Gate Valve not only provides temporary isolation solutions for water networks but also serves as a permanent installation once in place. Harnessing cutting-edge valve technology, this certified valve ensures an efficient and economical solution for your water system needs.

# Our Plant & Equipment

To ensure the successful completion of utility construction works, K&J Civil maintains a robust inventory of specialized plant and equipment.

## PLANT & EQUIPMENT

Category	Equipment	Details / Notes
<b>Excavators</b>	34T Excavator	Heavy excavation, deep trenching, large pipes
	20–25T Excavator	Versatile use, pipe installations
	12–13T Excavator	Urban trenching, medium cut-ins
	7.5T Excavator	Compact, road crossings
	5T Excavator	Confined space work
<b>Transport</b>	16T Tipper / 10T Tipper	Bulk haulage
	Hook Bin Truck (4 bins)	Spoil removal, site cleanup
	2T – 6T Tipper	Medium loads
<b>Attachments</b>	Hydraulic Hammer (3.5–34T)	For breaking rock/concrete across excavators
<b>Other</b>	Bobcat / Backhoe / Roller	General site works
	Lighting Tower	General site works
	PE Butt welder / Poly Pipe Welder	General site works
	Road Saw Cutting	General site works

# Testimonials

I just wanted to take a moment to thank you and the wider K and J Civil team for the great work you're doing on Work Package 2.2.

Linda, one of our Zero Harm Advisors, conducted an audit on site yesterday and shared some very positive feedback. She reported a high standard across the board—not only in terms of compliance and presentation, but also mentioned how seamless the process was and what a pleasure it was to engage with your team on site.

While audit scores are important, it's the attitude, professionalism, and the behind-the-scenes effort your team clearly puts into prioritising safety and compliance that truly stands out. That kind of commitment is a great example of the culture we're building at GCIS—and it's genuinely appreciated by both myself and the wider team.

If there's anything we can do to support you in maintaining these high standards, don't hesitate to reach out.

Keep up the excellent work!

Best regards,

**Thomas Richardson**

We have had a few enquiries from the community this week. I just wanted to let you know that we have received positive feedback from every phone caller in regard to the great progress, professionalism, tidiness, and helpfulness of the team onsite.

And I wanted to say a quick thank you for the effort on behalf of the community, the effort is noticed.

Kind regards,

**Jo Rogers**

I just thought I'd put this little email together to send through with regards to the Quality and Standard of the works especially the Restorations on Juliette St WMR Project.

Over the last 18 months this is without a doubt the best restoration I have personally witnessed on a project of mine to date. It would be worth noting we generally see great quality of workmanship across all of our projects however restorations as we all know sometimes tend to be rushed or lack the quality the project deserves due to project funds etc. To see K&J deliver a restoration of this standard on Juliette St which has been a project on our radar for a while is a great result for not only the Project Team but also our Customers given this is located in a very built up area and subject to massive amounts of pedestrian and vehicle traffic daily and really sets a high standard.

If there was ever a time to create a "What good looks like" to share with all our BMR/WMR for restorations then this is it. More than happy for this feedback to be shared with the K&J Team as a personnel thank you from myself and the wider UU Team. It makes the Final Inspection and Defect Walkthrough a breeze.

Regards,  
Daniel Marshall

What a great job by your teams, Brendan and Curtis 😊  
Thank you for completing this work safety and promptly.

Kind Regards

**Tony Bu**
